

<http://bootstrap1.braincrafted.com/getting-started>

Before installing Twitter Bootstrap for Symfony2 you need to have a working installation of Symfony 2.2.* at hand.

1 Composer

Fastest way to get started: add the following line to your `composer.json` file and run `composer update braincrafted/bootstrap-bundle`.

```
1. {
2.     "require": {
3.         "braincrafted/bootstrap-bundle": "dev-master"
4.     }
5. }
```

2 Activate

You have to add `BcBootstrapBundle` to your `AppKernel.php`:

```
// app/AppKernel.php
//...
class AppKernel extends Kernel
{
    //...
    public function registerBundles()
    {
        $bundles = array(
            ...
            new
Braincrafted\Bundle\BootstrapBundle\BraincraftedBootstrapBundle()
        );
        //...

        return $bundles;
    }
    //...
}
```

3 Assets

Since you are probably already using Composer this is the easiest way to get started. Update your `composer.json` file and execute the following line: `composer update twitter/bootstrap`.

```
1. {  
2.     "require": {  
3.         "twitter/bootstrap": "2.3.*"  
4.     }  
5. }
```

4 Link to BootStrap with the View

```
{% extends '::base.html.twig' %}
```

```
{% block body -%}
```

```
<!-- Le styles -->
```

```
<link href="../../../vendor/twitter/bootstrap/docs/assets/css/bootstrap.css" rel="stylesheet">
```

```
<link href="../../../vendor/twitter/bootstrap/docs/assets/css/bootstrap-responsive.css"  
rel="stylesheet">
```

```
<center><h1>Lista de Usuarios</h1></center>
```

```
<table class="table">
```

```
    <thead>
```

```
        <tr>
```

```
            <th>Name</th>
```

```
            <th>Age</th>
```

```
            <th>Username</th>
```

```
            <th>Password</th>
```

```
            <th>Email</th>
```

```
            <th>Actions</th>
```

```
        </tr>
```

```
</thead>

<tbody>
{% for entity in entities %}

  <tr>

    <td>{{ entity.name }}</td>

    <td>{{ entity.age }}</td>

    <td>{{ entity.userName }}</td>

    <td>{{ entity.password }}</td>

    <td>{{ entity.email }}</td>

    <td>

      <ul>

        <li>

          <a href="{{ path('user_show', { 'id': entity.id }) }}" class="btn btn-info">show</a>

          <a href="{{ path('user_edit', { 'id': entity.id }) }}" class="btn btn-success">Edit</a>

        </li>

      </ul>

    </td>

  </tr>

{% endfor %}

</tbody>

</table>

<ul>

<li>

  <a href="{{ path('user_new') }}" class="btn btn-primary">

    Anadir nuevo Usuario

  </a>

</li>

</ul>
```

```
</ul>

{% endblock %}
```

5 View Looks like this (Example)

Table with actions						
<input type="checkbox"/>	Rendering engine	Browser	Platform(s)	Engine version	CSS grade	
<input type="checkbox"/>	Trident	Internet Explorer 4.0	Win 95+	4	X	Edit Delete
<input type="checkbox"/>	Trident	Internet Explorer 5.0	Win 95+	5	C	Edit Delete
<input type="checkbox"/>	Trident	Internet Explorer 5.5	Win 95+	5.5	A	Edit Delete
<input type="checkbox"/>	Trident	Internet Explorer 6	Win 98+	6	A	Edit Delete
<input type="checkbox"/>	Trident	Internet Explorer 7	Win XP SP2+	7	A	Edit Delete
<input type="checkbox"/>	Trident	AOL browser (AOL desktop)	Win XP	6	A	Edit Delete
<input type="checkbox"/>	Gecko	Firefox 1.0	Win 98+ / OSX.2+	1.7	A	Edit Delete
<input type="checkbox"/>	Gecko	Firefox 1.5	Win 98+ / OSX.2+	1.8	A	Edit Delete
<input type="checkbox"/>	Gecko	Firefox 2.0	Win 98+ / OSX.2+	1.8	A	Edit Delete
<input type="checkbox"/>	Gecko	Firefox 3.0	Win 2k+ / OSX.3+	1.9	A	Edit Delete
<input type="checkbox"/>	Rendering engine	Browser	Platform(s)	Engine version	CSS grade
